The review can be downloaded from the City of Ostrava website [www.ostrava.cz/en](http://www.ostrava.cz/en) by following the links: Business – Investment opportunities – Real Estate Report.

**CITY OF OSTRAVA, CZECH REPUBLIC**  
Real Estate Report – 2017/QII

## INTRODUCTION

### CITY AT A CROSSROADS

Ostrava is the third largest city of the Czech Republic (300,000 people) and the capital of the Moravia-Silesian Region, which has more than 1.2 million people. Located at the meeting point of three countries (the Czech Republic, Poland and Slovakia), the population within a 100-km radius of Ostrava is 5 million people, making it one of the most densely inhabited regions in the EU.

Thanks to this strategic position at an international crossroads, the level of multilingualism among the region's people is relatively high in comparison with other EU regions, and the workforce is highly mobile. Newly developed infrastructure is being put in place. The high-speed railway corridor with express connections to Prague and also the D1 motorway is completed. The Leoš Janáček Ostrava Airport is also being developed.

### INVESTOR INTEREST IN THE REGION

The Ostrava region offers everything you need: a highly-educated workforce, renowned educational facilities, a wide variety of investment opportunities and plenty of recreation and leisure opportunities. Ostrava is home to three universities with 30,000 students, as well as a growing number of specialised language and technology institutions. The 1<sup>st</sup> International School of Ostrava was created in partnership with the City to provide English-language education from kindergarten to secondary school level for the region's ex-pat families, as well as local Czech students. Local clusters help to bring together companies in the automotive, IT and engineering industries. Ostrava offers a rich and varied range of cultural and sporting activities. The internationally renowned Colours of Ostrava Music Festival is not to be missed in the summer. The city also regularly organizes international sporting events, including the Ice Hockey World Championships (IIHF), or the IFBB Body Building Championships, the UEFA European Futsal Championship, ITF Davis Cup Matches, the IIAF World Athletics Tour Zlatá tretra Ostrava (Golden Spike Ostrava), and many others. Ostrava is surrounded by several picturesque mountain ranges, with five beautiful golf courses easily accessible from the city.

## A BASE FOR MANY COMPANIES

Ernst & Young ranked the Czech Republic amongst the twenty most attractive countries for investors. Important companies such as Hyundai Motor Company, Tieto, SungWoo Hitech, CTP Invest, ArcelorMittal, Siemens, PEGATRON Czech, and many others have their bases in and around Ostrava. Huge investor interest is now concentrated not only in traditional industrial areas, but also in hotels, logistics centres, office centres, retail space, and residential development.

## OSTRAVA IS ATTRACTIVE FOR INVESTORS

Ostrava received high marks from Standard & Poor's and Moody's, which gave the City ratings of A+ and A2 respectively. This goes to show that Ostrava's active approach has made it one of the most attractive targets for direct investments – not only within the Czech Republic, but throughout the whole of the Central European region.

Two of Ostrava's largest projects for potential investors can be found at the city's strategic industrial zones – Hrabová and Mošnov, as well as at the Science & Technology Park Ostrava. There are also interesting investment opportunities in the many brownfield sites in the centre of Ostrava and the outlying districts. The Vítkovice area represents the golden era of the city as a major centre of heavy industry, steeped in two hundred years of tradition.

Several 'A' grade office spaces, as well as residential projects by major European development groups, are currently under construction in Ostrava. The Nová Karolina site, in cooperation with Multi Development, is set to become the new business, residential, administrative and social centre of Ostrava. Not far away, the Ostrava-Hrušov site is now ready for investment.

The City of Ostrava also offers other select areas that are suitable for investment in light industry, office space, retail space and other commercial activities.

**Now is the time to become a part of the most dynamically developing region in the Czech Republic!**

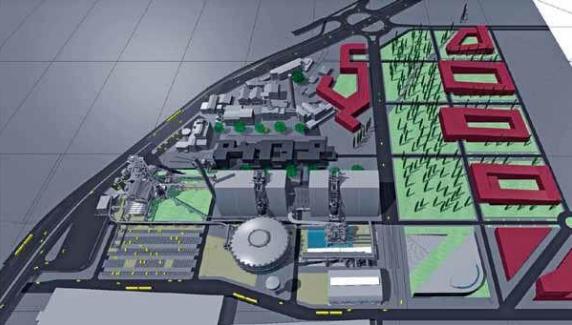

## MULTIFUNCTIONAL – Mixed Usage Buildings and Complexes

This chapter outlines new (especially large-scale) projects for multifunctional (mixed-usage) buildings and complexes that are already underway or under construction.

### THE VÍTKOVICE AREA – “NEW VÍTKOVICE”

 [Show on map](#)

City Districts:	Vítkovice, Moravská Ostrava
Developer/Investor:	Vítkovice, a.s.
Expected Costs (€)	2 200 mil. - rough estimate
Total Surface Area	253 ha – including Hrabůvka slag-heap
Start date:	2009
Completion date:	2014
Website:	<a href="http://www.dolnioblastvitkovice.cz">www.dolnioblastvitkovice.cz</a>

Industrial activity in the Vítkovice area was discontinued in 1998. The site covers an area of approximately 153 hectares and is divided into three parts. The northern part, known as the Lower Vítkovice area, was once the site of the blast furnace, the coking plant and the chemical plant. In 2002, thanks to its unique historical significance, the Lower Vítkovice area was listed as a National Heritage Site, and in 2008 it became the first Czech landmark to be listed as a European Heritage Site. Engineering plants occupy the central part, and the southern part contains a group of administrative and industrial premises. In the autumn of 2003, the site was purchased by the engineering giant Vítkovice a. s.

#### Future use:

- Museum, exhibitions related to technical themes – mining, engineering, etc.
- Sports and recreation
- Science, research & development, universities, various education and training
- Entertainment and culture

**MULTIFUNCTIONAL – Mixed Usage Buildings and Complexes**

**NEW KAROLINA – NEW CITY CENTRE**

 [Show on map](#)

City District:	Moravská Ostrava (City Centre)
Developer:	Multi Development (Netherlands)
Investor:	Morgan Stanley Real Estate Group
Expected Costs (€)	300 mil.
Total Surface Area	32 ha
Retail:	96 882 m <sup>2</sup>
Offices:	24 600 m <sup>2</sup>
Residential:	78 646 m <sup>2</sup>
Leisure & Sport:	8 226 m <sup>2</sup>
Parking:	3 500 parking spaces
Architects:	OMA, Rotterdam, Netherlands T+T Design, Gouda, Netherlands Eva Jiřičná Architects, London Helika, Inc., Prague, Czech Rep. CMC Architects, Prague
Start date:	2008/Q2 (resumed 2010/Q1)
Completion date:	2018
Website:	<a href="http://www.nova-karolina.cz">www.nova-karolina.cz</a>

The Karolina site is probably Ostrava's best-known post-industrial brownfield. It is unique among comparably-sized European cities, due to its huge surface area and its location in the very heart of the city centre. The entire area has been fully decontaminated; a process that was completed in 2005. The development zone covers an area of 32 hectares and offers an attractive opportunity for investors, thanks to its central location. After winning the public tender, Dutch property developer Multi Development began construction on the site in June 2008. The global economic crisis suspended building until March 2010, extending the completion date of Phase 1 (reconstruction of the historical electrical power plant buildings) in 2012. The project in its entirety will be completed in 2018, and will comprise 97 000 m<sup>2</sup> of retail space, 67 000 m<sup>2</sup> of office premises, around 78 000 m<sup>2</sup> of residential space, and 3 500 parking spaces. With such renowned names from the architectural world as Rem Koolhaas involved in the project, the New Karolina development is set to become the architectural jewel in Ostrava's crown.

The ultimate aim of the development project is to extend the current historical centre of Ostrava southwards to cover the site of the former Karolina coking plant, while also ensuring that there is a smooth transition between the old and

**CITY OF OSTRAVA, CZECH REPUBLIC**  
Real Estate Report – 2017/QII

new parts of the city centre. The aim is to create a new structure for central Ostrava, in which all of the new blocks, individual buildings, streets and squares are organically interconnected (both in their proportion and function) with Ostrava's historical city centre. All protected heritage sites and historic buildings on the Karolina site and in the nearby surroundings will play a well-defined role in the new structure of the city centre. All the elements of New Karolina – streets, squares, landmarks, parks and open spaces – will be clearly delineated and logically interrelated, and will apply an integrated design conception: these are the key goals of the New Karolina project.

**MULTIFUNCTIONAL – Mixed Usage Buildings and Complexes**

Name:	<b>Kampus Palace</b>		
Investor/ Developer:	Sedm stromů a.s.	City District:	Moravská Ostrava (Smetanova Square)
Website:	<a href="http://www.kampuspalace.cz">www.kampuspalace.cz</a>	Expected Costs (€):	7,3 mil.
Note:	350 student beds	Usable Floor Area (m <sup>2</sup> ):	29 800
		Start:	2015/Q3
		Completion:	2016/Q2

Note:	Hrušov Development Area is located in the north-eastern part of Ostrava, with access to the D1 motorway. The total acreage to be revitalized and redeveloped is approximately 34.7ha.  Plans have been developed for the future utilization of the site. The project will involve the construction of office units, civic amenities, retail and logistics units, plus research and testing facilities.	Completion:	2017

## BROWNFIELDS

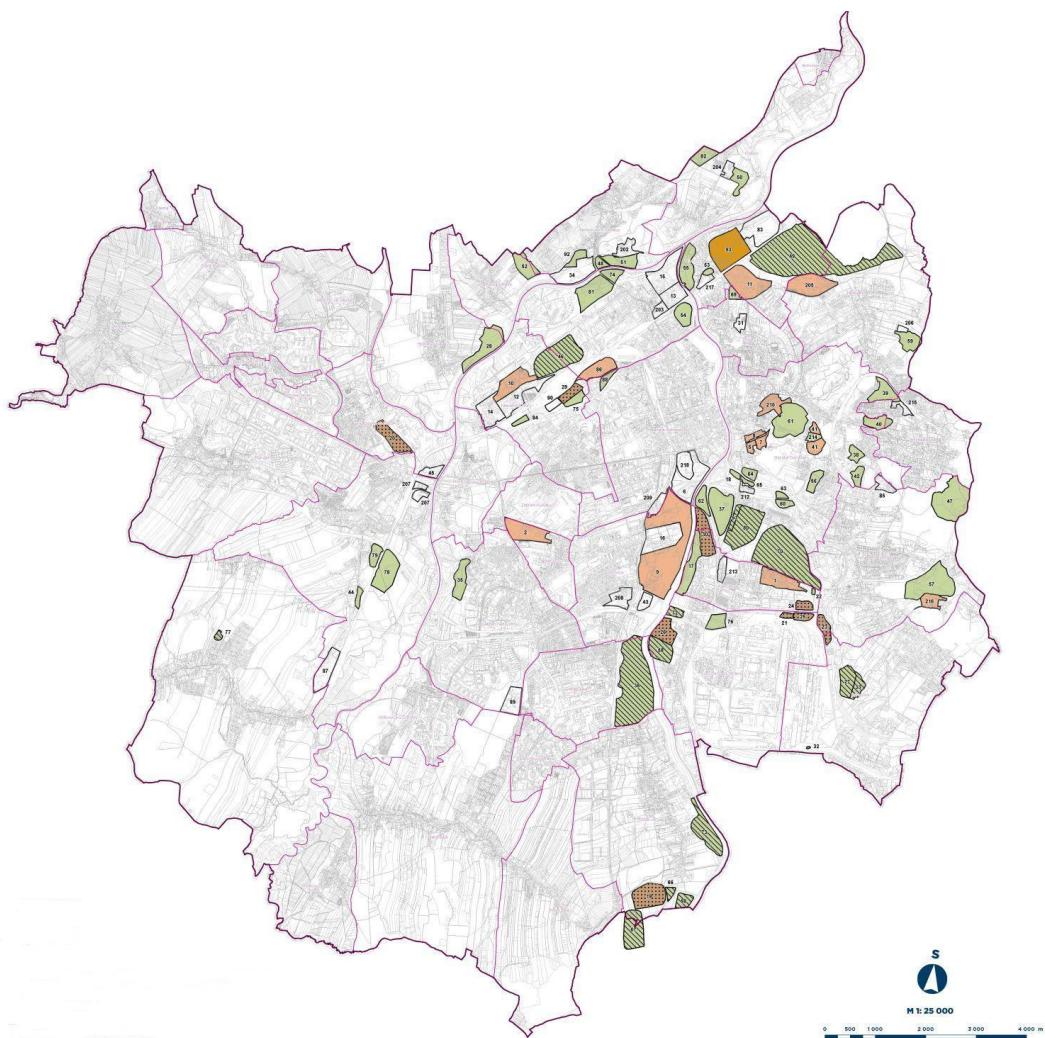

This chapter gives an outline of brownfield areas in the City of Ostrava.

The total area covered by brownfields is about 8 % of the total area of the city.

Types of brownfields:

- Reclaimed land – former coal mining sites
  - Social brownfields – former residential areas
  - Sites undergoing reclamation
  - Industrial brownfields
  - Coal-ash settling basins
  - Former brownfields
  - City limits
  - Boundary of urban cadastral areas
  - Site boundary
  - Number of brownfields/sites
- 21

Location map of brownfields in Ostrava
